AYUSH AGRAWAL

IT ENGINEER

P +91 9518325201 **E** ayushakl67@gmail.com **A** Nagpur, Maharashtra **W** GitHub

OBJECTIVE

- Dynamic and Motivated Graduate in IT Engineering Seeking Entry-Level Job Position. I am determined to carve out my niche in the vast IT industry as a developer.
- I'm seeking a chance to join a respected organization where I can put my skills to work and learn and grow in the field. I want to be part of projects that let me use my abilities to contribute to the company's success while also enhancing my skills.
- My goal is to create a win-win situation where I can contribute and develop simultaneously.

PROJECTS

E-COMMERCE WEBSITE

- Developed an Electronic Products-focused E-commerce site using ReactJS (frontend) and MirageJS (backend testing)
- Ensured a seamless shopping experience with a visually appealing interface and secure transactions.
- Implemented lazy loading for enhanced website performance, ensuring efficient loading of images and content.

REAL ESTATE LISTINGS

- *'Real Estate Listings'* is an online platform designed for property buyers. Users can explore property listings, conduct searches, and securely complete transactions.
- Created a user-friendly online platform for property buyers using ReactJS.
- Improved the experience with advanced search filters and secure transactions.
- Ensured a secure and hassle-free online marketplace for easy property exploration.
- Integrated REST API for efficient communication, allowing seamless updates and data retrieval.
